

AgroEco Research app

<http://sautiyawakulima.net/agresearch>

User's manual

1. DOWNLOADING AND INSTALLING.

The AgroEco Research app works on most phones with Android operating system version 3.0 (Honeycomb) or higher.

1. Make sure that your phone allows you to install applications from "unknown sources" (that is, from sources different from Google Play)... to check whether you can do this, go to Settings >> Security, and check the "Enable unknown sources" checkbox. If you can't find that option there, you can try in Settings >> Applications.
2. Connect your phone to the Internet and navigate to <http://sautiyawakulima.net/agresearch> using your phone's browser.
3. Enter your login data (user alias and password).
4. You will see the main menu of the AgroEco Research web application. Choose 'Download app'.
5. A new screen will appear, with the logo of the app. Press the button labeled 'Download' found just below the logo.

6. The app should start downloading. On most Android phones, you can check the status of your download by sliding your finger from the top to the bottom of the screen... if this doesn't work, please check your phone's manual.

7. After the app has been downloaded, select it from the downloads section. Once you agree to grant the necessary permissions for the application, it will be installed on your phone.

2. CONFIGURING.

You should be connected to the internet in order to configure the AgroEco Research app. You need to configure the app before you can start using it.

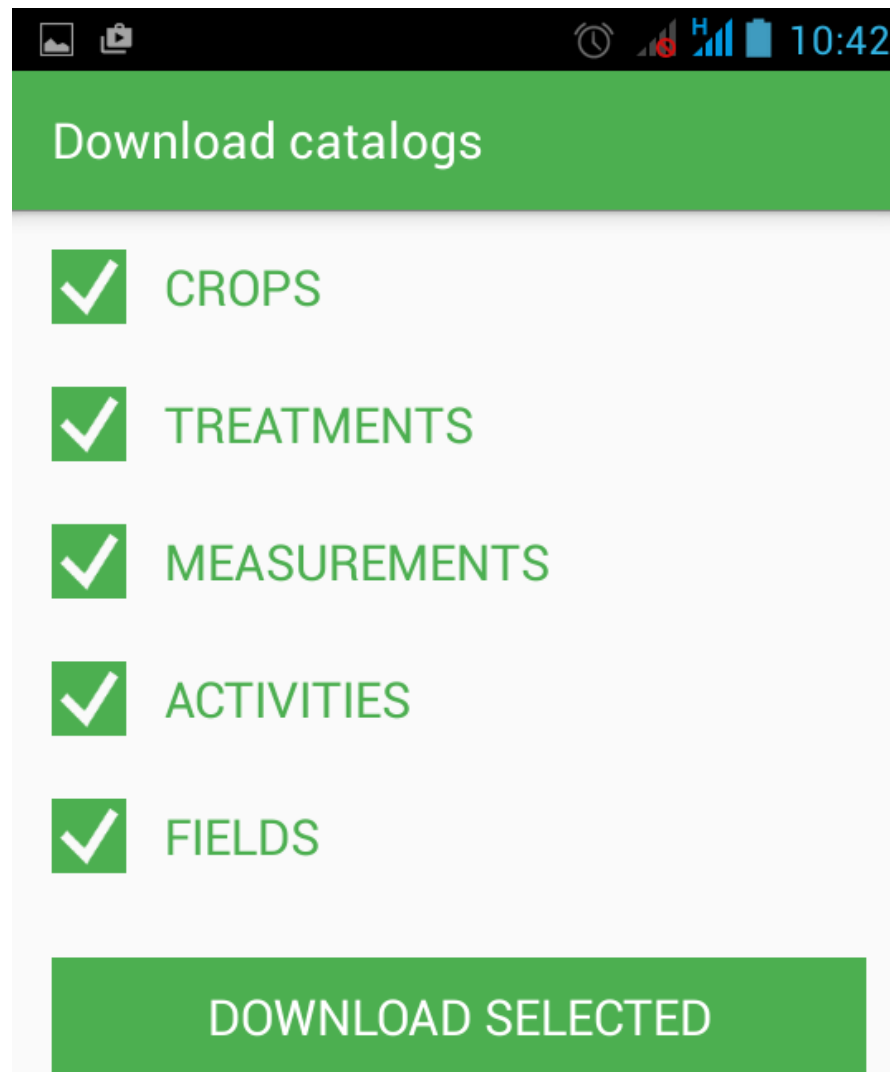

1. When you open the AgroEco Research app, you will be asked to login. Please enter your login data.

2. You will be asked to enter the URL of the server to which the app will connect. Please enter the following URL, carefully avoiding typing mistakes:

<http://sautiyawakulima.net/agresearch>

3. Once you've entered the server URL, you will see the Main Menu. Since the catalogs containing the research framework data have not been downloaded yet, you will only see a few options. To download the catalogs, choose 'Settings'

4. On the Settings screen, choose 'Download catalogs'. You will see the following screen:

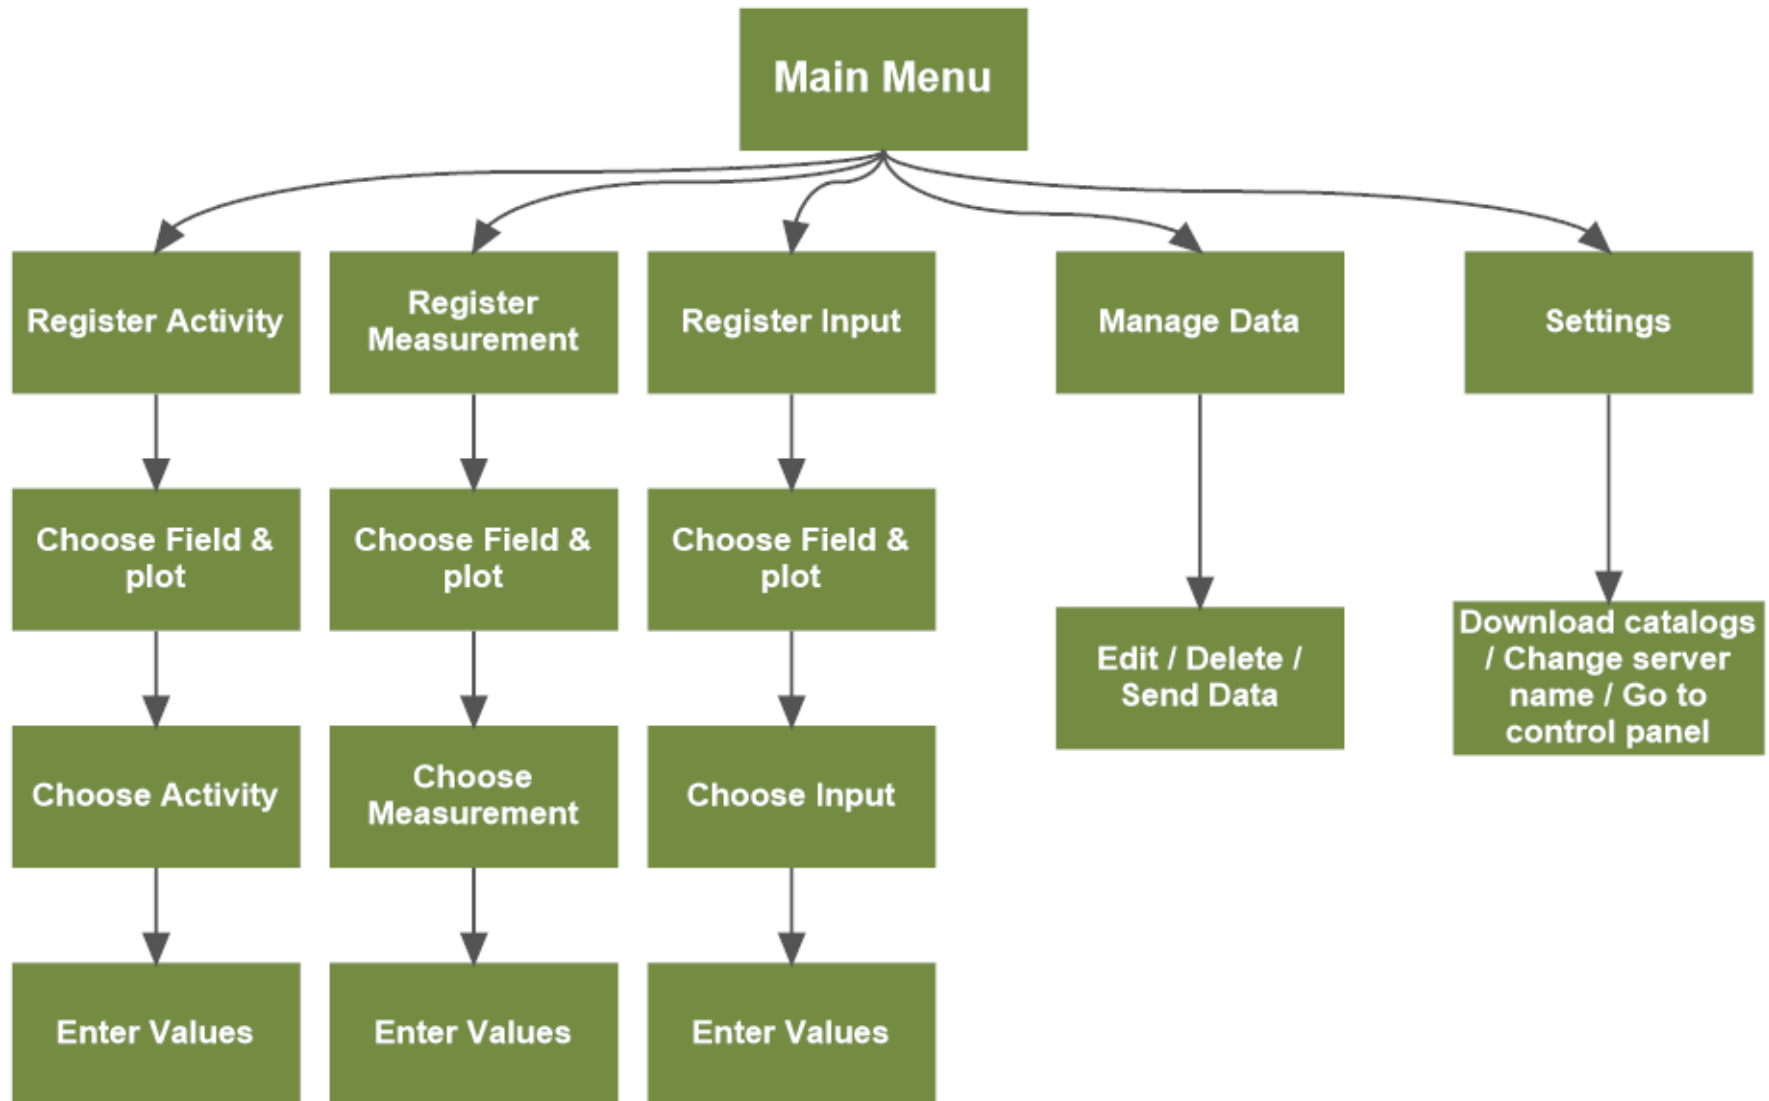

5. Make sure that all the catalog names are checked, and that you are still connected to the internet. Press 'Download selected' to download the catalogs. Once they have been downloaded, you can start using the AgroEco Research app.

3. USING THE AGROECO RESEARCH APP

The following diagram illustrates the structure of the AgroEcoResearch app. Please note that, at any point, you can go back to the previous screen by pressing the 'Back' button on your phone.

4. REGISTERING AN ACTIVITY, A MEASUREMENT OR AN INPUT

The first step in data collection tasks is to choose the field and the plot (or the entire field) where the data was produced. After you press one of the data collection buttons on the Main Menu (Activity, Measurement or Input), you will see the following screen.

The screenshot shows a mobile application interface for registering an activity. It features a green header bar with the text 'Register activity'. Below this is a green button labeled 'MASASI R1'. Underneath the button is a section titled 'Choose a plot' containing a 4x4 grid of colored squares. Each square contains a label: 'C1', 'C1+L', 'C2', or 'C2+L'. The colors of the squares correspond to the legend: yellow for 'C1', light green for 'C1+L', dark green for 'C2', and medium green for 'C2+L'. Below the grid is another green button labeled 'CHOOSE ENTIRE FIELD'. At the bottom of the screen is a black box containing a legend with the following text: 'C1: Cassava (Kiroba)', 'C2: Maize (Staha)', 'L: Cowpeas (Local)', 'Control treatment', 'Soil management', 'Pest control', and 'Soil management and pest control'. Red arrows point from text boxes to specific elements: 'Press here to choose a field' points to the 'MASASI R1' button; 'Choose a plot by pressing it' points to a square in the grid; 'Press here to choose the entire field' points to the 'CHOOSE ENTIRE FIELD' button; and 'Legend' points to the black legend box.

Register activity

MASASI R1

Choose a plot

C1	C1+L	C1	C1+L
C2+L	C2	C2+L	C2
C1	C1+L	C1	C1+L
C2+L	C2	C2+L	C2

CHOOSE ENTIRE FIELD

C1: Cassava (Kiroba)
C2: Maize (Staha)
L: Cowpeas (Local)
Control treatment
Soil management
Pest control
Soil management and pest control

Press here to choose a field

Choose a plot by pressing it

Press here to choose the entire field

Legend

This screen allows you to choose the field and the plot for which the data will be entered. If the data is relevant to the entire field, you can press the button 'Choose entire field'. Alternatively, you can directly select a plot by pressing it.

After choosing the field and plot, you will be able to choose the activity, measurement or input in the following screen:

Choose activity: Masasi R1

Plot 10: Cassava (Kiroba)
Intercropping, Pest control

Field work

Harvesting
Last : Never

Irrigation
Last : 8 days ago

Planting
Last : 9 days ago

Weeding
Last : 8 days ago

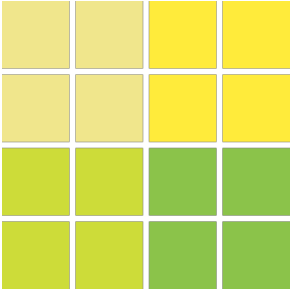

Pest control

Pest control application
Last : Never

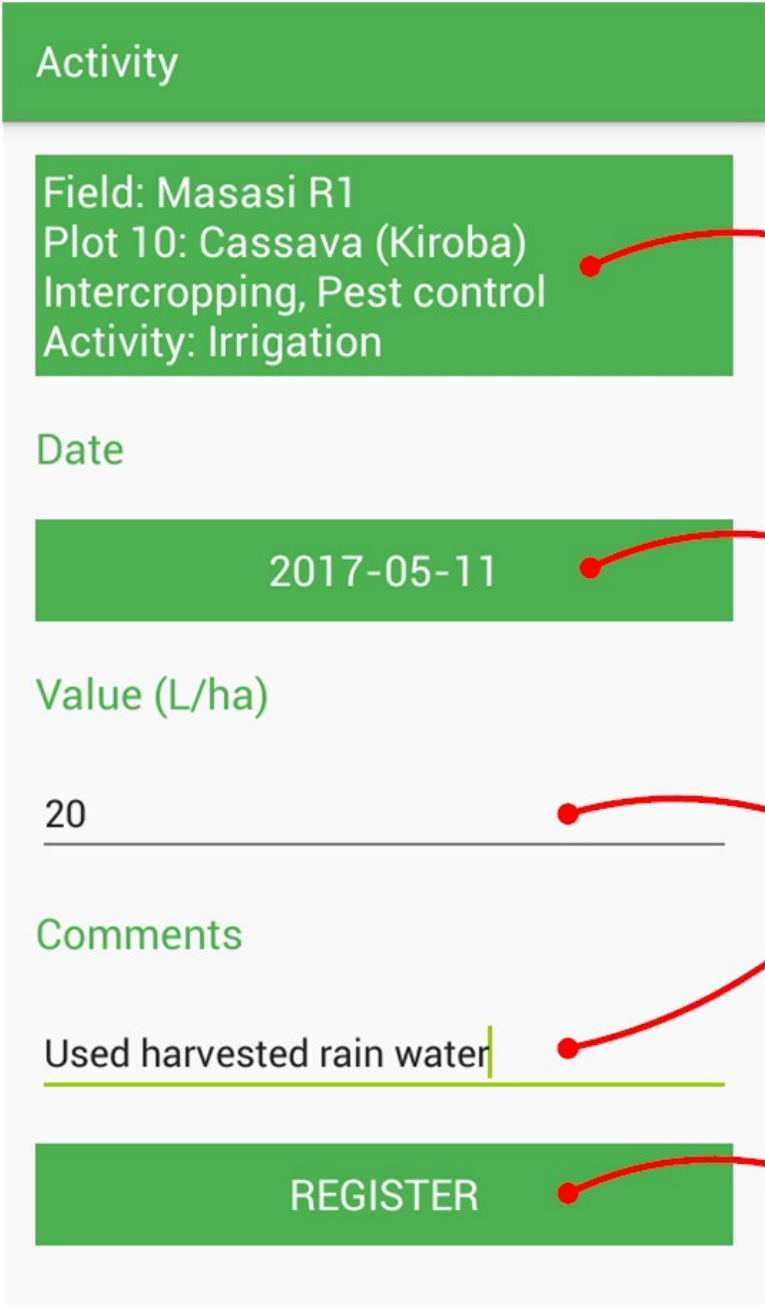

Pest control preparation
Last : 8 days ago

Plot information

Choose an activity, measurement or input by pressing it

Finally, you will be able to enter the relevant values for the chosen activity, measurement or input in the following screen:

Activity

Field: Masasi R1
Plot 10: Cassava (Kiroba)
Intercropping, Pest control
Activity: Irrigation

Date

2017-05-11

Value (L/ha)

20

Comments

Used harvested rain water

Press here to change the date

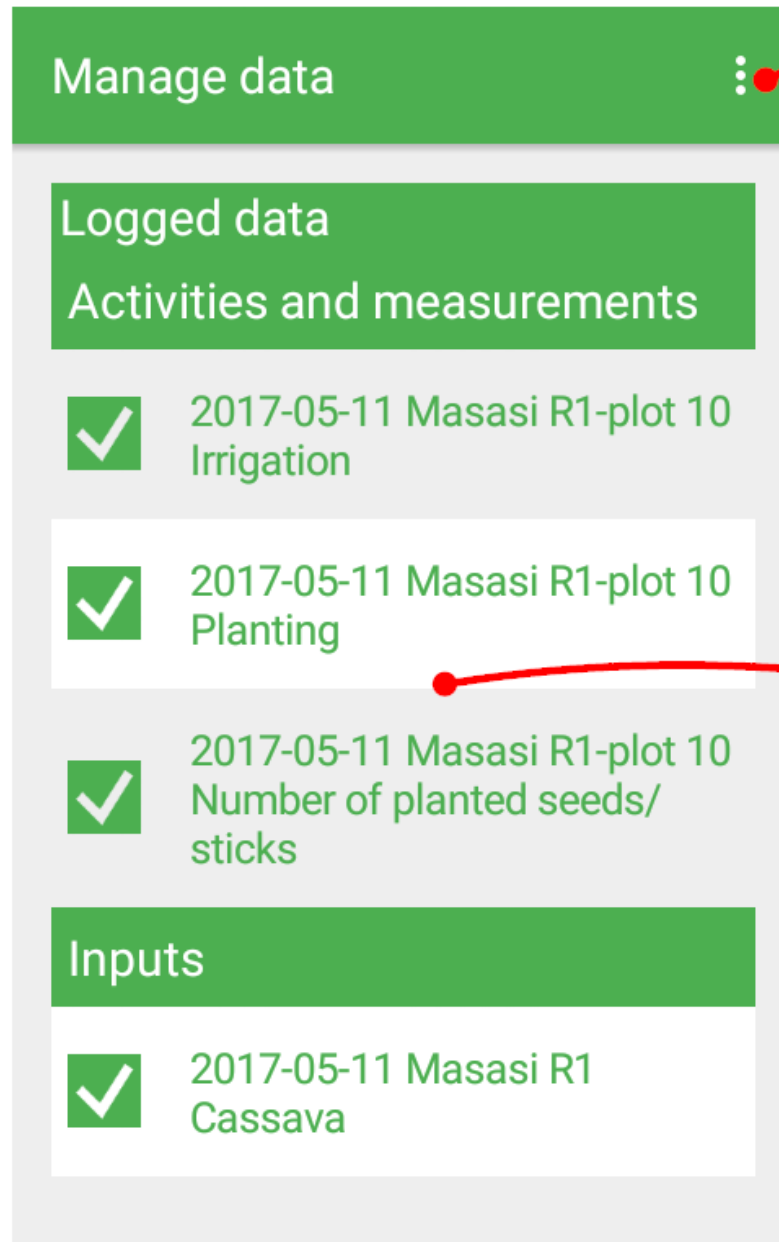

Enter values here

Press here to register data. If you press the 'Back' button, data will not be saved

5. MANAGING DATA

The AgroEcoResearch Data Manager allows you to review, edit, delete and send the data you have recorded.

The screenshot shows a mobile application interface for managing data. At the top is a green header bar with the text 'Manage data' and a three-dot menu icon. Below this is a green bar with the text 'Logged data' and 'Activities and measurements'. The main content area is a list of data items, each with a green checkmark icon on the left and text on the right. The items are: '2017-05-11 Masasi R1-plot 10 Irrigation', '2017-05-11 Masasi R1-plot 10 Planting', '2017-05-11 Masasi R1-plot 10 Number of planted seeds/ sticks', and '2017-05-11 Masasi R1 Cassava'. A green bar at the bottom of the list is labeled 'Inputs'. Two red callout boxes with arrows point to the three-dot menu icon and the '2017-05-11 Masasi R1-plot 10 Planting' item.

Manage data

Logged data
Activities and measurements

✓ 2017-05-11 Masasi R1-plot 10 Irrigation

✓ 2017-05-11 Masasi R1-plot 10 Planting

✓ 2017-05-11 Masasi R1-plot 10 Number of planted seeds/ sticks

Inputs

✓ 2017-05-11 Masasi R1 Cassava

Press here to access the data manager menu. From the menu, you will be able to send or delete the selected data items

This is the data item list. Press a data item to review or edit it. Press its corresponding check box to select or deselect it

6. SETTINGS

The Settings screen will allow you to perform the following tasks:

- **Download catalogs:** Data framework catalogs must be downloaded in order to enable the data collection tasks. This is normally done at the beginning of the process, as explained on p. 5. However, it is possible to download the catalogs again at any point in the process, in case the data framework has been updated.
- **Define server:** The server name (or URL) is defined at the beginning of the process, right after the application has been installed. However, it is possible to change it if needed.
- **Control panel:** This option allows you to access the web control panel of the AgroEcoResearch project, by opening your phone's web browser and navigating to the control panel's URL.

7. REVIEWING AND EDITING DATA ON THE WEB APPLICATION

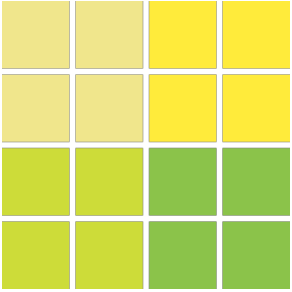

The data that is sent from the AgroEcoResearch app is aggregated and stored in a web database. You can access the contents of this database to review and manage the data.

To do so, go to <http://sautiyawakulima.net/agresearch> and enter your login data.

You will see the Main Menu of the web application. Press 'Manage log' to review and edit the AgroEcoResearch data.

On the following page you will see an example of how the logged data will appear.

7. REVIEWING AND EDITING DATA ON THE WEB APPLICATION

Click this check box to select or deselect all items

Click any check box to select or deselect single items
